THE

DALTON SHOOTS

Makes Rapid Advances and Is in

SWANSEA AND SOUTH SWANSEA

The Chicago Mine-A Famous Old

The dealings on the floor of the Mining Exchange yesterday were confined

bidding, and there were some good advances noted.

In the listed stocks a general depression was observable all along the line, and there was hardly one of the stocks but that suffered a bear movement, and brain had full possession of the pit, and yet this state of affairs was largely due to the fact that but of orders were not overly plentiful. Still, the declines were not of a character calculated to cause only analise, and these was as the bonyance most of the shares. calculated to cause any angle, and part of stockholders as the bouyancy of most of the shares are so well known that there is no doubt but that at the that there is no doubt but that at the copper call today they will go even higher, than before. Builion-Beck and Mercur, two of the most popular of the listed stocks, were both quoted at figures below the prices of the day previous, and

yet these securities were wanted or or streets after the call at an advance over these quotations, so that the prices quoted at the morning call was really to go by, as sales were made much higher figure in the after-

in the bidding, while slight advances the Mount Nebo mining district and were noted in Daiy-West, Mammeth that certain parties are quietly shipped of the day before, and Four Aces held. The Republic representative made its own in the bids, although in the offerings it declined a few cents.

offerings it declined a few cents.

There was quite a furore in the pit when the unlisted stocks were called, and it was plain to be seen that the bovines were running the shop to please themselves. Swansea made decided advances in the bidding, and in the offerings it was tossed up into the offerings it was tossed up into the clouds. Still no sales in this paper were noted, although there was an earnest inquiry for the stock. South Swansea was also in good demand, and touched the \$1.25 point in the bidding, while holders pushed the selling price up to the \$1.40 poark and it is beginning to be opening out to a large body of ore. look as if it would soon be neces-ry to attach weights to the stock to sen it from going out of sight. Nat-al Gas advanced a cent in the bidding, with no sellers in the pit ding, with no sellers in the pit. Sunbeam held its own in fairly good shape,
but chronicled no sales. The excitement of the call, however, was when
Daltons stock exhibited a strong upward tendency, and made sales at z
cents, with an active demand for more
of the stock at this figure with no responses from the sellers according at
Messus, Blackett and Lamb baye of the stock at this figure with no responses from the sellers, excepting at a much higher quotation, which was firally accepted and transfers recorded at 3½ cents, and at the close the stock was firm at this bid and 3½ cents asked. Little Pitisburg also displayed some activity for the first time for several months, and 1,000 shares changed hands at 1 cent a share. When the call closed on Northern Light buyer and seller were 10 cents apart, and the stock was very strong at these figures.

The transactions of the day were as follows:

SALES OF STOCK.

1,000 Daiton at 3½ cents. 135 Daiton at 3 cents. 1,000 Little Pittsburg at 1 cent. Total sales, 2,125 shares. The closing quotations were as fol-

Richmond & Anaconda..... THE OLD CHICAGO MINE.

A Famous Old Producer That Gives Promise of Coming to the Front.

The old Chicago mine in Dry canyon, in Ophir mining district, which at one in spiver, is a late arrival.

Samples from the Floreer and Hogducers in the state and which at a ham lodes, Boise county, have been reducers in period furnished all the ore that was necessary to keep two smelters in operation at Stockton, gives promise of re-entering the list as a heavy shipper of the precious metals, as arrangements have been made for the active verking of the property this

The Chicago is owned by H. W. Lawrence and the Kimbail estate and a
short time aro, as mentioned in these
columns, a lease was obtained on the
property by Arbogast and the Bowring Brox, of this city, who have been
at work ever since in cleaning out the
mine and in doing dead wark, but now
everything is in readiness for continucus ore extraction this winter, as a
whim has been but in at the mouth of
the incline, car tracks have been laid,
winterquarters established and the
winter's supply of food has been laid
in.

Rowe, E. B. Wicks, A. F. Holden,
James A. Pollock and George F.

Holden has 1,996 shares and Rowe,
Wicks, Pollock and Downey one share
each. A. F. Holden is president and
treasurer of the company: James A.
Pollock vice-president, and Edward
B. Wicks secretary, who with E. E.
Rowe and George F. Downey form the
directorate.

The property of the incorporation

UP. for its large bodies of carbonate lead ores, which have been followed down to the 1,200-foot level; but in taking out this ore immense deposits of copper ore were left in what was believed to be the casing of the vein, and it has been discovered of late by the lessees Makes Rapid Advances and Is in Good Demand.

known where there are large bodies of mineral already exposed and ready for extraction, but these are in old work-ings where the air is bad and where

the intention to devote considerable time to the copper deposits exposed in the property, as the bodies of this ore have been traced from the surface down to the lowest levels, and as copper is in good demand just now, it is the opinion of the lessees that the copper feature of the mine should be their main hold until the opening up of the large devosits of lead carbonates. the large deposits of lead carbonates, and by that time it is hoped that there will be an advance in the metal quota-

MOUNT NEBO MINES.

What the Nephi Republic Has to Say of Them.

It has been known for some time Daly remained practically unchanged that work was quietly progressing in

ding good pay ore. The Republic representative made some inquiries relative to the matter and found that the reports were cor-

Messrs, Hyde and Murphy, it is said, have 30 burros packing ore in sacks down to the railroad track for ship-Sun- ment, a distance of five miles from

Found a Fortune.

Eligateen months ago John Pierce of Tembstone, Ariz., was a poor labering miner, broken down from hard work, his wife and children being obliged to his wife and children being obliged to belp in making a living. Late one cvening, says the Los Angeles Mining and Metallurgical Journal, at the time the story begins, Pierce was driving the cows home from pasture and was about four miles from his ranch, when he picked from a little ledge a piece of rock which he was about to throw at one of the tardy animals, when observing that it was of unusual weight, he concluded to carry it home. Upon close examination it was found that it contained gold.

contained gold.

He went to work promptly at the spot from which it had been taken, and soon made a shipment of ore that netted \$2,000. With this money he sank a shaft a few feet and then bonded the property for \$250,000.

Before the year expired the bond was sold to an English syndicate for an advance of \$300.000. In Jury last Pleare.

son to an engine syndicate for an advance of \$100,000. In July last Pierce received a draft on San Francisco for \$250,000 in full, and is now in that city with his family, enjoying the delights and blessings of a fortune.

Very Rich Ore.

Secretary Hunter of the Mining Exchange, says the Democrat of Boise, change, says the Democrat of Boise, Idaho, received some very rich specimens of gold ore from the Little Giant mine at Warrens last week. It assayed \$11,155.30 in gold to the ton, and \$2.40 in silver. From a piece of ore about the size of your thumb Mr. Hunter got a gold button as big as a pea. Specimens of ore taken from other claims in that district were also received. All of this rock is very rich, being specified with gold.

A piece of ore from the North Starmine at Shaw Mountain, taken from a five-foot vein on a 206-foot level, assaying \$88.88 in gold and eix ounces in silver, is a late arrival.

Chectorate.

The property of the incorporation consists of one-third interest in the Mary Ellen, Live Yankee, Live Yankee extension, Jupiter, Saturn, Uranus, Neptune and Venus mining claims in the American Fork mining district, Table county.

Broker Ken Donnellan was up to the Park the first of the week on mining business. This famous old camp, he says, is all O. K. and in a condition to hold its own for a great many years to come.

GRAND CENTRAL STRIKE

ceived nearly half a million from ore receipts and in the sale of the Jim Crow and Monitor mines to De Lamar; and now, in the April Fool, Mr. Wilson and his associates have a property that, with development, will be the equal of the De Lamar mines, which are reputed to be the greatest producers in the west.

A number of shipments of high-grade ore from the April Fool mine were made to this city, and it is not more than ten months ago that a combination stamp mill was creeted on the property and a water line constructed from a spring several miles distant. The mill has ten stames with a machinery capacity for the addition of 20 more, and it is the intention to make this addition to the plant sometime next spring.

The April Fool Mine—A Brief History of This Nevada Gold Property and a water line constructed from a spring several miles distant. The mill has ten stames with a machinery capacity for the addition of 20 more, and it is the intention to make this addition to the plant sometime next spring.

During the past year the owners of the April Fool have expended \$125,000 in the erection of a mill and in the development of the property, and it is stated that in the group of claims owned by the company over 5,000 feet of work has been paid for from ore taken from has been paid for from ore taken from Is Being Congratulated—Five Thousand Shares Change Hands at the Park-Ore and Bullion-Silver and Lead-Mining Notes and Personals.

Ore and Bullion.

The ore and bullion receipts yesterday were as follows:

Commercial National bank, gold and ilver bars, \$1,500.

National Bank of Republic, Ajax ores, \$2,000; cyanides, \$2,300.

McCornick & Co., bullion, \$4,100; ores, \$10,200; cyanides, \$11,500.

Wells, Fargo & Co., bullion, \$3,564.

T. R. Jones & Co., bullion, \$3,100.

Silver and Lend.

Silver and lead quotations yesterday ere as follows: Western Union, bar silver, 65% ents; lead, \$3@\$3.05; lake copper, \$11.50

The clearings of the associated banks

yesterday were \$271,065. For the same day last year they were \$315,416.

The man who digs wealth out of the there is one of these nature's noblemen in this country, that man is Ed Loose of Provo, who has done much towards developing the hidden resources of Tintic mining district, and who can say that through his efforts the camp can now boast of two or three more producing mines than it could have done if he had not put in his time and worked it when they were aware that they were aware tha done if he had not put in his time and good money in the endeavor to demonstrate his theory that in the mount-ains north and east of the Mammoth mine some of the richest deposits of mineral in the district were to be

found.

It was Ed Loese that developed the Utah and the Sloux Consolidated mines, and it was Mr. Loose that originated the Grand Central enterprise that led to extensive developments that have been going on for some time on ground located between the Mammoth and the Centennial-Eureka mines.

There is hardly a mining man in the state of Utah that is not familiar with the large amount of work that has been done in the endeavor to find the ore zone in the Grand Central ground.

ore zone in the Grand Central ground, and if the company that has been backing this enterprise had been at all weak in the knees the work would have been abandoned long ago; but as it was, the men behind the project were stayers and long-winded and as a consequence it is safe to sav that now they are strictly in it, as word was re-

they are strictly in it, as word was re-ceived in this city yesterday that on the 260-foot level in the Grand Central a two-foot body of high-grade ore had been uncovered the day before. The details of the new strike have not been received as yet, but from all accounts there is every reason to be-lieve that the find is a most important one, as the formation is lime, and the mines of that district, when the min-eral iz found in this rock, invariably eral is found in this rock, invariably show up rich and large ore bodies, and the deposits are permanent. «It has always been the opinion of

news is true.

FOUND TIN IN UTAH.

Important Discovery Claimed to Have Been Made in This State.

It has been claimed that Utah was the repository of every known metal with the exception of tin, but if reports can be relied upon there is every reason to believe that this valuable commodity has been discovered in this state; but the locality of the valuable discovery has been so far locked up in the breasts of the fortunate prospect-

Captain F. M. Bishop, the wellknown assaver, was called upon yes-terday to determine the character of a piece of buillon that was brought to him by two gentlemen whose names were withheld from The Herald reporter. It was enough, however, to learn that the metal was pure tin, and it was stated that the denosit of this ore had been found in Utah and that

the ledge was a large one.
The bar of the referred to bad been run out of the ore in a blacksmith's forge, and there was no doubting that it was the bure stuff, and the gentlemen who brought it in say that they have a fine body of this metal, and as The Herald is informed that they are reputable men, it is safe to say that the report is a truthful one and that this useful and valuable metal can be added to the list of the products of the state of Utah.

THE APRIL FOOL MINE.

Brief History of This Valuable Nevada Gold Property.

In another column in this issue the readers of The Herald will see that the April Fool Gold Mining company has filed its articles of incorporation and that the personnel of the officers

bam lodes, Boise county, have been received furnished all the ore chart was necessary to keep two smelters in operation at Stockton, gives promise of re-entering the list as a neavy shipper of the precious metals, as arrangements have been made for he active vorking of the property this center.

The Chicago is owned by E. W. Lawence and the Kimbail estate and a chart time aro, as mentioned in these rolumns, a base was obtained on the property by Arbogast and the Bowr-divided into a like number of shares or divided into a

state of Nevada.

Five years ago the writer took dinner with Frank Wilson in a tent that stood near the prospect hole of the April Fool mine, and all the development that had been done on the property at that time was an open cut in which there was a fine body of one in which the free gold could be seen with the that had been done on the property at that time was a fine body of ore in which there was a fine body of ore in which the free gold could be seen with the naked eye. This ore was being sacked by Mr. Wilson and his associates, and to say that they were excited over the discovery and their good luck is putting it mild. At that time everything in that locality was wild and woolly. There was not a house where De Lamar now stands and all the water for drinking and cuinary purposes had to be hauled in barrels for several mines.

At that time the owners of the April Fool claim were offered \$5,000 for the property, but this offer was laughed at, and since that time they have re-

of work has been done, all of which has been paid for from ore taken from the mine during the time mentioned above

Mr. Dooley, Mr. Wilson's partner, is
also one of the solid men of that
country, and it is safe to say that from
this time on the April Fool will make
a great name for itself.

The growth and development of the
April Fool mine is an instance of
what percentagency thick and good

dollar. The drift had been run about 40 feet from the shaft, when it broke through. There was rejoicing on the street when the news began to circu-late.

Work has been commenced on the

of exploration. A nice bunk house is being built, and a force of hands will be kept at work all winter. At differ-ent points on the property the vein crops out, and it can be traced for some

distance. It lies parallel with the Omaha vein. The work is under the direction of Mr. McIntyre.
On the same vein as the Vanderbilt is located the Cedar Hill group, owned by Colonel Wall. Considerable work is by Colonel Wall. Considerable work is being done on this property. The oreveln exposed here is about 25 feet thick, and carries values of about \$5 per ton. Like the Omaha, it is a contact vein, and is well defined, the hanging wall being porphyry, and the foot wall lime. It can be traced from Ophir canyon to the foothills south of Lewiston canyon, and probably extends as far as Five Mile pass. Located on the same vein is the Broken Hill, owned by Gillespie and Hoimes; the Warren group, owned by Mayne & the Warren group, owned by Mayne & Scheu; the Monte Christo, Granite Mountain and a number of others. Work is being done on all the claims along this and the Omaha vein.

Every day brings prospective pur-chasers to the camp, and it is asson-ishing to see the number of men who are willing to brave the storms and mud in order to visit some particular piece of property, with a view to investment

Claims have been located so thick in the district that there is scarcely a foot of ground between Mercur and the valley on which some one has not located a claim, but on many of thesellitile or no work has been done. Wherever any attempt at development has

been made, however, the indications have been encouraging.

The facilities for milling in the western foothills are much better than at Mercur. The mills at Mercur have a very heavy expense in the item of water. As an illustration, one of the leading mill superintendents states that the Mercur company saves yearly It is also stated on good authority that a contract has been let by Builting men that an immense body of ore would be found at some point between the Mammoth and the Centential Bion-Beck people for 200 feet of tunnel work on Mount Nebo.

Taken altogether the new finds seem to indicate the inauguration of better times for Nephi and vicinity, the claims being only a short distance.

Work is quietly progressing on the coal claims 12 miles southeast of Nephi, and owned respectively by Abbott, Black and SI Foote, which promise well for the owners.

Found a Footen and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi, and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi, and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles southeast of Nephi and owned respectively by Abbott, Black and SI Foote, which promise well for the coal claims 12 miles and vicinity.

The relitities for milling in the west-tween the Mammoth and the Centennial Eureka mines. If it is this that has been struck in the Grand Central thas been made, however, the indications have been encouraging.

The facilities for milling in the west-tween the Mammoth and the Centennial Eureka mines. If it is this that has been made, however, the indications have been encouraging.

The facilities for milling in the west-tween the Mammoth and the Centennial Eureka mines in the district.

The real Eureka mines in the district.

The report that a contra miles, and a large pump is necessary to force it to the tank on the divide. In the west foothills the distance is short, and the water will run from the creek without the aid of expensive

machinery.

Being close to the valley, timber and other supplies can be freighted more easily and therefore cheaper than to the top of the hills. If it shall prove that the strikes in this locality are as extensive as those in Mercur, and there is good reason to believe they are even more extensive, then indeed the new camp, which is bound to grow, will surpass the present one, in

grow, will surpass the present one, in every particular.

The Herschei yesterday broke through into the gold vein and the whole force of the drift is now in ore of a fair value. The extent of the body is of course only a question of guess work, but there is every reson to believe

but there is every reason to believe that the tunnel has reached the goal for which it was started.

The western hills are covered with parties trying to see if it is possible to get in on the ground floor. Surveys ar being made in some cases to see some fraction overlooked by

being made in some cases to see if there is not some fraction overlooked by the locators.

The Victor and Buckeye are two claims that are located between the Geyser and the Gold Dust. A tunnel has been driven in some distance, and an open cut is being made from the outcroppings of the gold vein to those of the silver vein, both of which can plainly be traced. The gold vein to those of the silver vein, both of which can plainly be traced. The gold vein shows a face of 15 feet, with values of 35. With some more development work the property will be a milling proposition, and the owners propose to make it so as soon as possible.

The boiler at the upper shaft of the Golden Gate was disabled a few days ago through carelessness or some other unknown cause. As a result the mine air has not been as pure as it usually is, and one of the workmen fainted away on the street today from the effects of bad air while going to his home.

E. F. Seinman, the Mercur clothice.

B. F. Seinman, the Mercur clothier. unde an assignment today to the Na-ional Bank of the Republic. The as-ignment caused considerable surprise, is it was believed Mr. Seinman was doing a good business.

BUYING VALLEJO STOCK.

Five Thousand Shares Change Hands at the Park. Park City, Nov. 24.-Vallejo stock is

alling rapidly at present, 5,000 shares having been purchased during the past ew days. All the stock has been sold n Park City and to people of limited nears, no one person having pur-chased over 400 or 500 shares. In ten days or two weeks the bridge

however, that an assay of \$3.60 in gold GOVERNMENTS and two and one-half ources in silver

nel at the Autumnal, it being started 200 feet below the old one, and will cut the vein 100 feet below the old work-

lings.

Peter Krawler has several men working at the Dunberberg and Gulf mines, which are located near the Vallejo. The new tunnel is in 200 feet.

The Silver King now enjoys telephone connections with the Park, the work of stringing the line having been finished, vesterias.

ished yesterday.

Shipments from the Silver King have been rather light for the past few days on account of bad roads.

The work or retimbering the Ontario drain tunnel No. 1 has progressed 2,350

feet from the mouth.

Harry Deming has a very fine-looking sample of ore which came from near the Glenco, one and one-half miles on this side of the Vallejo.

ED LOOSE CONGRATULATED. People of Provo Delighted Over the Grand Central Strike.

country, and it is safe to say that from this time on the April Fool will make a great name for itself.

The growth and development of the April Fool mine is an instance of what perseverence, pluck and good judgment will do, and this example could well be followed by mining men who are always wishing that they could strike it rich.

STRIKE IN THE HECLA.

STRIKE IN THE HECLA.

Interesting Budget of Mercur News

From The Herald Man.

Mercur, Nov. 24.—At last the Hecla has broken into the ore, and although assays have not yet' been made its general resemblance to the ore in the Brickyard leaves no doubt as to its being the ore body. The boys have worked hard and faithfully, and some of them had about reached their last dollar. The drift had been run about if from the shaft, when it, broke through. There was reloicing on the street when the news began to circulate.

Work has been commenced on the Golden Ward group, north of the La Golden Ward group an

April Fool Gold Mining & Milling company were filed with County Creik Stanton yesterday. The incorporators are Frank M. Wilson, W. J. Dooley, H. T. Duke, Henry Rives and P. Sheahan, The capital stock is placed at \$500,000 divided into 100,000 shares of the parvalue of \$5 each Wilson takes \$4.83 divided into 100,000 shares of the par value of 35 each. Wilson takes 84,882 shares, Dooley 15,115 shares and Duke, Sheahan and Rice one share each.

Frank M. Wilson is president of the company. W. J. Dooley treasurer and secretary, and these with Harry T. Duke form the board of trustees.

The property of the company consists of certain interests in the April Fool, Sumpter, Dublin, Lookout, Cliff, Thanksgiving, Boomer, Quail, Aurora.

of Queen Vic. who is interested in the Creole mine at Park City, has returned from his trip to England and it is his intention to make a visit to the mine the latter part of this week.

Judge Henry Rives, Dat

inity of mining iltigation.

J. W. Power left this morning for Dry canyon, where he will let a contract for the assessment work on the Elia, a property held by him and others in Bingham. After completing this business he will go to Mercur where he will begin work on the Autora group and superintend the assessment work on the G. A. R. group.

Judging from the Mining and Metallurgical Journal of Los Angeles, Cal., C. L. Dignowity of this city took a very active part in the miners' convention recently held in San Francisco, and in looking over the pages of the Journal it was easy to see that Mr. Dignowity was well loaded with zeal and enterprize as far as the mining industry in Utah was concerned, as he limbered out his gailing guns and fired some hot shots concerning the mines of this state.

Dave Teachenor, the well known mining and of the states who was in the

guns and fired some hot shots concerning the mines of this state.

Dave Teachenor, the well known mining man of Bingham, who was in the city yesterday, informs The Herald that as one of the creditors of Bacon's bank he was giad of the chance to take Dalton and Lark stock at a dollar a share in seitlement for his account, and he further says that he considers that the Dalton and Lark is one of the greatest properties in the west with its half a dozen or more big mines to draw from. Mr. Teachenor is one of the best posted miners if West Mountain district and his ceitmation of the Dalton and Lark mines is on a par with that of others that have examined this property.

"I have some interesting news to tell

miners in West Mountain district and alia cettimation of the Palton and Lark mines is on a par with that of others that have examined this property.

"I have some interesting news to tell you," said Ed Airis of the Mercur mine to The Heraid reporter yesterday. The soribe thought that he was about to learn of an important strike in the Mercur mine and was interested accordingly, "What is it?" said he, with his notebook and pencil in hand, "Why," said Airis, "the wife of a well known family at Lander, Wyo., has presented her husband with triplets, and what do you suppose they have named the kids." "That is a hard question to answer," replied the reporter. "Perhaps they were named McKinley, Hobart and Dorsey," "No," said Mr. Airis, "they were named McKinley, Hobart and Hanna. And," he continued, "I want you to put this in the paper, as it is as good as a mining item. So here it is."

Councilman B. T. Lloyd, ho is the owner of the Gold Coin group of claims in Camp Floyd mining district, has cancelled the bond on the property and has just let a contract for the performing of development work on the group, the contractors beginning work yesterday. The Gold Coin, group is composed of 13 claims, including three or four fractions, and the property is located just north of the Golden Scais, at Mercur. Considerable work has already been done on the Gold Coin, and it is considered as one of the best surface propositions in that portion of the district, as assays in large numbers have been obtained from top rock ranging from \$1.20 to \$6.31 in gold to the ton. Mr. Lloyd expects to show up what is in this ground and he is of the opinion that it will not take him very long to do so.

Hal D. Brown, of the Sutter Creek Gold Mining company, has just received a letter from Manager J. A. Brent, who is now at the company's properties in Amador county, California, in which Mr. Brent states that he is just letting a contract for the sinking of 200 feet on the quartz ledge oven the suffer may be a firm of the same ledge a mile and a ha

CHICAGO GENERAL MARKET. Wheat Stronger and Higher-Oats

Follow Wheat. Chicago, Nov. 24.-In total disregard of a weak feeling in Liverpool, the market for wheat here was strong and higher for wheat here was strong and higher today. The disposition of traders was to go it alone and reported sales of flour at San Francisco and of cash husiness transacted at this place, but stimulated that idea. There was some apprehension of a squeeze in December which added to the strength displayed. Light receipts in the northwest, 652 cars against \$25 last Tuesday, and III a year ago, were an argument in favor of higher prices. Second Liverpool cables were even weaker than the early ones, but no recognition was accorded them. Chicago received 83 cars and inspected out \$2.52 bushels. The Liverpool Corn Trade News was out with an estimate that Europe would require 18,500,000 bushels monthly from America between now and next harvest. This was the leading factor in causing the advance. Bradstreets report of only 1,500,000 bushels increase in

Fifty Years Ago.

This is the way it was bound to look When grandfather had his "picter took." These were the shadows cast before And his art: like a girl in a pinafore Some day to bloom to a goddess fair. Men certainly were not as black, we know As they pictured them, 30 years ago. ~~~~

Ayer's Sarsaparilla

began to make new men, just as the new pictures of men began to be made. Thousands of people fronted the camera with skins made clean from blotch and blemish, because they had purified the blood with Ayer's Sarsaparilla. It is as powerful now as then. Its record proves it. Others imitate the remedy; they can't imitate the record :

50 Years of Cures,

the world's stocks caused a sharp bulge around the noon hour. Closing Liverpoof cables gave a net advance of %d for the day. Continental markets were irregular. Export clearances aggregated M1573 bushels. May wheat opened from 8% to 80%; sold between 87% and 87%, closing at 81%382; 1%661½ higher than yesterday. Estimated receipts for tomorrow, 45 cars. No. 2 red spot wheat raged from 81% to 50, closing at about 85%,685%.

Corn moved upward fractionally early but was inclined to not slowly 2nd the gain was not considered legitimate. The rade consisted mainly of scalping and local operations of no purificular moment or significance. Receipts were 354 cars, and 20,556 bushels were withdrawn from stock. Liverpool opening cables were quiet and %d higher. Closing ones were idd lower.

Oats—The tone and direction of oats were obtained from wheat but like continer was no enthusiasm. A slight advance took place, though the feeling was quotably only steady. Receipts were 358 cars and 12,665 bushels were taken from stock. Exports were 61,271 bushels. Brandstreets reported a decrease in stocks of \$55,000 bushels. May oats closed a shade over yesterday. Estimated receipts for tomorrow 135 cars.

Provisions—A steady to firm feeling obtained in product at the start. Hous were up 5 cents, that being the man proposition of an encouraging nature. Offerings became heavier near the close declines resulting. January pork closed 15,500 cents lower, January pork closed 15,500 cents lower.

over. Closing prices: Wheat—November, 78%; December, 78%; 185%; May, 81%-987; Corn—November, 28%; December, 28%; May, 27%. Outs-November, 18%; December, 18%; Oats November, May, 25%, Pork-December, 6.57%; January, 7.65; May, 7.57%, Lard-December, 3.82%; January, 4.62%; May, 4.25, Ribs-December, 3.72%; January, 3.89;

Chiengo Live Stock.

Union Stock Yards, Nov. 31.-The supply of cattle today was light and the de-mand slow. Prices were about steady. Offerings of hogs were moderate. The demand was not brisk and prices declined 5 cents after a previous firmer feeling.

Receipts of sheep were light. Prices under a good inquiry advanced 10 cents

La Grange, Ind., Nov. 24.-A. J. Royer and Joseph Royer of this city, together and Joseph Royer of this city, together with several hundred prospective heirs scattered throughout the United States, will seek to establish a claim to the estate of one Jacques Royer, the exact date of whose death is not known but whose undivided fortune is reported to be \$146,000,000. Of this immense fortune, \$189,000,000 is represented in bonds issued by the government of France. The residue of the estate, valued at \$50,000,000, is represented in real estate holdings in St. Lou's.

Ran With a Hole Through His Heart New Hoven, Conn., Nov. 24.-Frank Richards, who lived near Torrington, was playing with some other boys in a field, when a loaded ride which they had was discharged. The bullet struck young Richards in the breast and passed directly through his heart and out of his body. Despite his death wound in the heart, he got up and ran all the way flome, arriving there ten minutes after the fatal shot. He died in two or three minutes after reaching home. Richards, who lived near Torrington, was

Chillicothe, O., Nov. 24.—At Remington station an old colored tramp named frimes yesterday found a pockethook be-side the railroad tract and handed it to It was found to contain \$200 in money and a package in which were a diamond ring and stud and a tot of loose diamonds.

The pocketbook is supposed to have been dropped from a car window.
